

Mobile Supply Chain in a Box, ERP Solution Set

Powered by RF-SMART for Mobility

INTRODUCTION

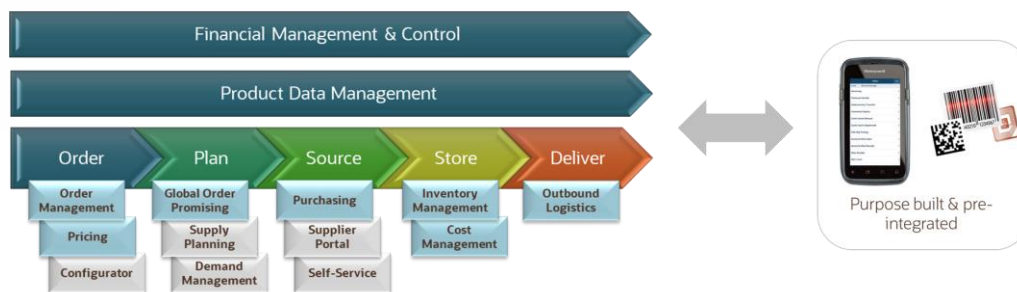

The Oracle Mobile Supply Chain in a Box ERP Solution Set allows your organisation to rapidly **deploy modern, mobile enabled, best practice Cloud processes to transact, manage and account for the full end-to-end supply chain process**. It includes capabilities from procurement through to order management, inventory management and shipments supported by mobile technology, as well as full financial control. As such the solution set also provides the complete, integrated financial flows and accounting required to better manage your cash cycle, financial reporting and fixed assets.

The solution set brings together the vast experience of deploying Cloud SCM & Financials from **Oracle Consulting** coupled with our **strategic partner RF-SMART's** solution, providing mobile execution to Cloud SCM.

Beyond enabling this core mobile supply chain management and financial capability, the solution set provides **a platform for growth**, not only from expanding deployment to other sites or supply chain processes, but from adoption of additional Cloud functionality including emerging technologies such as the Internet of Things and related automation opportunities.

SOLUTION SET SCOPE

The below diagram shows the high-level solution set scope:

The solution set will provide procurement capability allowing control of spend and the ability to manage the supply base and will most importantly provide functionality to complement the supply chain processes with mobile enabled transactions throughout, as shown below:

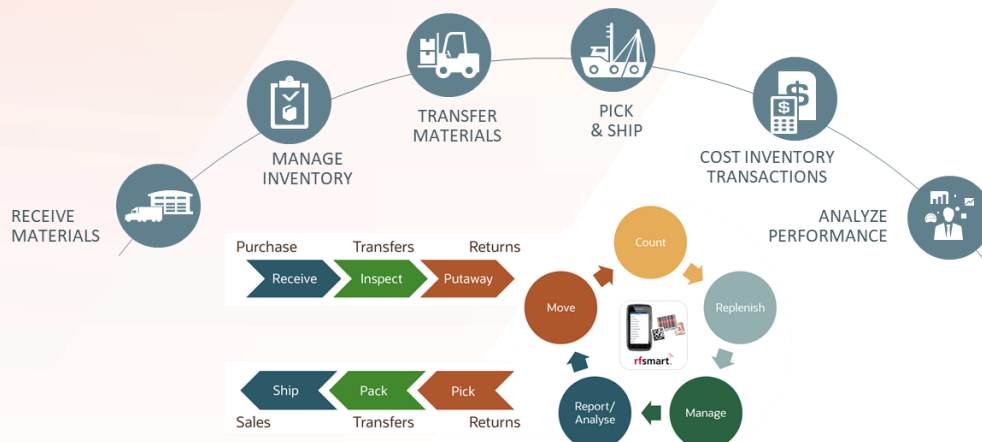

Key Cloud Benefits:

- Decrease total cost of ownership.
- Quick ROI.
- Deploy proven best practice processes, refined with experience.
- Scalable approach, deploy initial Cloud offerings and expand capability.
- Scalable platform, allowing solution to grow in line with company growth.
- Rapid, low cost approach using our proven True Cloud Methodology.
- Reduced Cloud deployment risk with Oracle Consulting & RF-Smart.

Solution Set Approach:

- Fixed scope, timeline and price with financing options available.
- Refined approach for organisations of between one and three inventory sites.
- Provide instant value in 19 weeks with accelerated deployment.
- Expand into additional functionality and emerging technologies, driving further value and differentiation in market place.

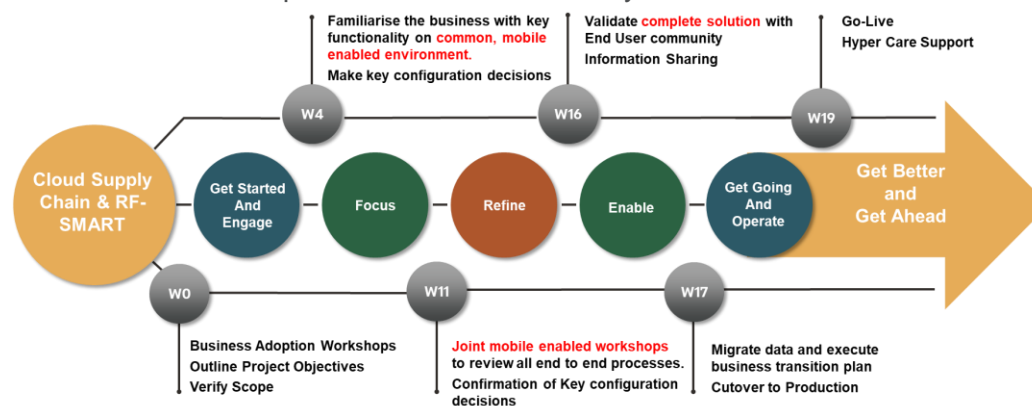

The Order to Cash and Planning capability has been designed to quickly provide the ability to capture orders, price orders and ship orders to the end customer, whilst supporting the core capabilities for demand and supply planning, enabling the full end-to-end SCM flow.

The financial capabilities deployed by the solution set will allow full adoption of the Cloud environment for both Supply Chain and Financials alike, providing the ability to manage all aspects of accounting, reporting, cash management and fixed assets within the single Cloud environment. Integrated SCM and financial flows such as automated customer billing for shipments, 3-way/4-way matching for goods-inwards receipts as well as full payment and cash management functionality are enabled by the deployment.

SOLUTION SET TIMELINE

The combined Oracle and RF-SMART accelerated implementation timeline of 19 weeks will follow the phases and include the key activities outlined below:

Other Optional Services:

- The Solution Set provides “Out of the box” standard functionality and configuration options. To enhance this offering Oracle can provide further optional services for:
 - Chart of Accounts Design, if this is required prior to project commencement.
 - Reporting, to build personalised customer reports in addition to the standard Oracle reports and Dashboards.
 - Data Migration, where this requirement exceeds the DM approach laid out in the Solution Set.
 - Integration, where other legacy systems need to be integrated with the SaaS environment.
 - Technical components e.g. PaaS extensions.

Implementation Details:

- Business Adoption sessions are included to quickly mobilise project.
- Familiarisation & Playback sessions included to visualise and tailor solution.
- 2 test validation cycles.
- Inclusive of post-production support.

Key User information sharing sessions included to enable customer led end-user training.

PROJECT DELIVERY APPROACH

The project delivery approach is based on Oracle's True Cloud Method (TCM) and has been extended with the key elements of RF-SMART's delivery approach for mobile. The combined result reduces timeline and risk by driving adoption of the modern best practice processes supported by the mobile enabled Cloud functionality. The approach is described below:

OPTIONAL COMPONENTS:

In addition to the core offering, the solution set approach also comes with predefined areas of flexibility e.g. Supply Chain Planning, Supplier Portal, allowing customers to include additional functionality. These optional fixed priced components can be discussed further based on your specific requirements, ensuring the final solution meets your overall needs.

Furthermore, RF-SMART can also offer extended services to provide hardware and Wi-Fi infrastructure, along with labelling capabilities, in addition to enabling mobility for the software related processes that complement the Oracle Best Practice processes provided by this solution set. This ensure that everything you need to become a fully mobile enabled organisation can be achieved as part of this solution set.

Business Adoption:

- Business Adoption is an integral part of moving to the Cloud, and Oracle Consulting's Business Adoption team can help you assess the impact of implementing Oracle Cloud in your organisation. Included in this solution set are three key Business Adoption workshops to:
 - Facilitate the initial mobilisation of the project and project team.
 - To ensure the project approach is structured, leveraging maximum value from the early stages of the project.
 - To support the customer to set up for success.

Next Steps:

- Oracle Consulting is your complete Cloud partner from implementation through transition to production readiness. Our innovative and flexible approach coupled with RF-SMART's ability to deliver mobile solutions will provide you with a cost-effective, high quality project that result in fast time-to-benefit.
- For more detailed information regarding this offering please speak with your consulting sales executive or reach out to the contacts below.

About Oracle Consulting

Oracle Consulting is the #1 Consulting Organisation for Oracle Cloud Implementation. The team is focused exclusively on Oracle Cloud solutions and staffed with the experts that others turn to for best practices. With our global scale of more than 7,000 experts in 175 countries serving more than 20 million users, we know how to get you up and running in the Oracle Cloud as quickly and cost effectively as possible.

Oracle Consulting uses field-tested methodology and a network of worldwide experts to develop solutions that address your challenges and strategic initiatives, providing you with a complete, transformational cloud journey that modernizes your business.

About RF-SMART

RF-SMART has been offering mobile supply chain solutions for Oracle since 1992 and now has over 1,300 Oracle customers, 80% of which are using Cloud based technology.

As Oracle's strategic partner to extend mobility to Cloud Supply Chain, RF-SMART is pre-integrated into Cloud, offering a seamless end-user experience and enabling a customer's workforce to operate efficiently and productively through an easy-to-use interface.
