

Product Management in a Box Solution Set

Supply Chain Management, Oracle Consulting UKIE

INTRODUCTION

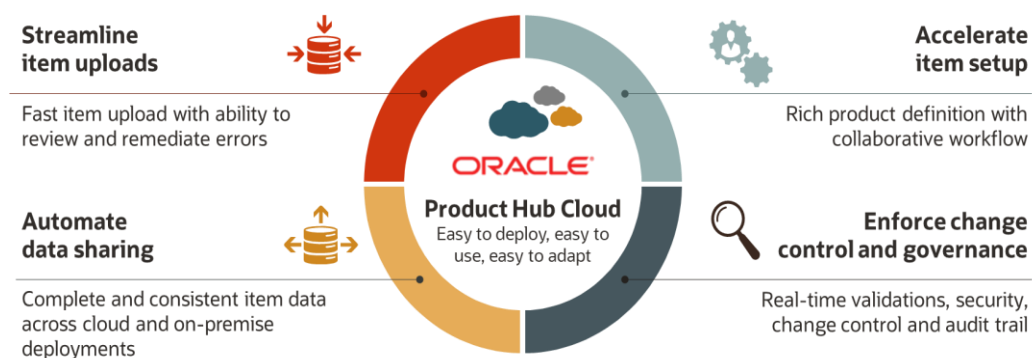

The Oracle Product Management in a Box Solution Set allows your organization to rapidly **deploy modern best practice Cloud processes** and enables companies to **consolidate all product information into a central repository** that is based on a single, extensible data model. This provides the capability to **improve item accuracy** and standardise information. Items can be classified appropriately, making them easy to find and manage. Once your data has been consolidated and enriched it can then be **shared across internal and external systems**.

Organizations can control business functions and operations using predefined industry standard operational attributes. Security settings drive distinct views of the system, to ensure the **appropriate levels of security are applied** as well as **providing governance** as to which roles within the organisation can define, view and enrich the item data.

These capabilities will truly allow you to use Oracle applications as a differentiator in your market place. The Solution Set for Product Management accelerates delivery of the capabilities and benefits with **a cost-effective implementation approach** (and innovative commercial options) that brings fast, predictable results with reduced risk.

SOLUTION SET SCOPE

The solution set will deploy the core capabilities that are delivered by the Cloud SaaS Product Hub application:

Key Cloud Benefits

- Decrease total cost of ownership.
- Quick ROI.
- Deploy proven best practice.
- Processes refined with experience.
- Scalable approach, deploying initial Cloud offerings and expanding capability.
- Scalable platform, allowing solution to grow in line with company growth.
- Rapid, low cost implementation using our proven methodology.
- Reduced Cloud deployment risk with Oracle.

Solution Set Approach

- Fixed scope, timeline and a fixed transparent price with financing options
- Refined approach for organisations of between one and three inventory sites.
- Go-Live and provide immediate value in 12 Weeks with the accelerated deployment approach
- Drive rapid value and then further implement additional functionality and emerging technologies, driving further value and differentiation in market place.

Implementation Details

- Familiarisation & Playback to visualise and personalise solution
- 2 test validation cycles
- Inclusive of post-production support
- Key user information sharing sessions included to enable customer led end-user training.

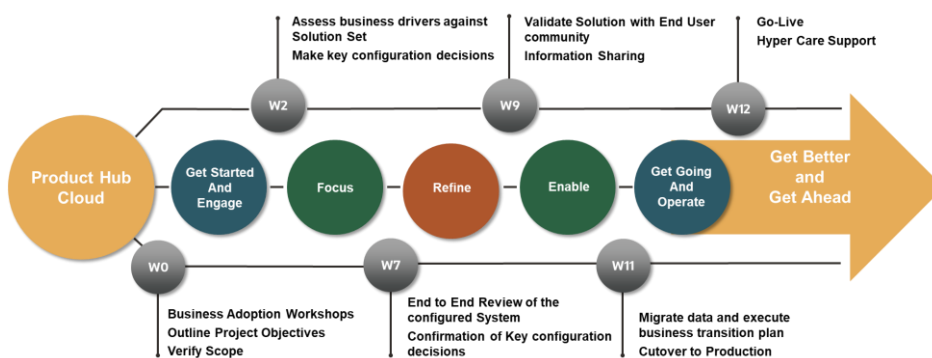

The solution set will provide the ability to:

- On-Board product data from internal or external systems using a choice of import capabilities.
- During the import/ entry process classify products within a product taxonomy and product catalogs.
- Take advantage of the validation and assignment rules capability within the application to assist with the initial enrichment and control of your item attribution.
- Enrich product information with seeded and user defined attributes, digital assets, product relationships, and product configurations.
- Govern new product introduction within your organisation by using an enrichment workflow, ensuring the right members of your organisation are updating attributes that are appropriate to their role, and providing a final approval mechanism prior to publishing the data.
- Providing a change management processes for updates/ changes to your item data with a flexible and collaborative workflow.
- Share validated product data with internal and external systems through the publication capability, as well as making use of the in-built reporting capabilities of the Oracle SaaS products.

SOLUTION SET TIMELINE

The accelerated implementation timeline of 12 weeks will follow the phases and include the key activities outlined below, the accelerated timeline approach can also be adjusted to include an additional Play Back activity or optional components should that be desired:

Business Adoption Services:

- Business Adoption Services are an integral part of the Oracle True Cloud Method approach, helping you assess the impact of implementing Oracle Cloud. These services can be optionally included in this Solution Set. This would include three key Business Adoption workshops:
 - to facilitate the initial mobilisation of the project and project team;
 - to ensure the project approach is structured to leverage maximum value from the early stages of the project; and
 - to support the customer to set up for success.

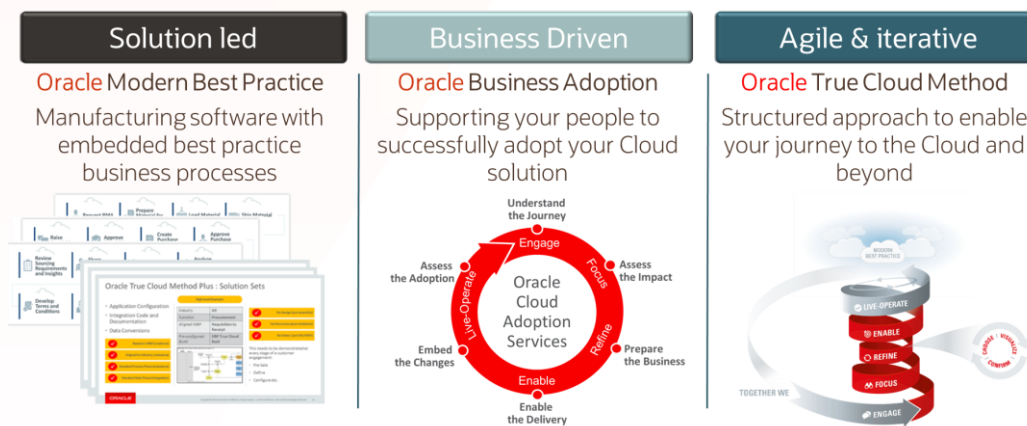

Other Optional Services:

- The Solution Set deploys a solution based on "Out of the box" standard functionality, configuration options and reports.
- Oracle can provide additional services, for example around reporting, automation of integrations, Cloud Adoption and any be-spoke technical requirements, which can all be tailored to customers specific needs, and can be discussed as required.

PROJECT DELIVERY APPROACH

The project delivery approach is based on Oracle's True Cloud Method (TCM). The approach reduces timeline and risk by driving adoption of the modern best practice processes supported by the Cloud functionality - it is solution-led, and provides an agile and iterative approach, allowing you to visualise and refine the solution early in the project lifecycle.

The approach is described in the diagram below:

Next Steps:

- Oracle is your complete Cloud partner from implementation through transition to production readiness. Our innovative and flexible approach to delivery drives cost-effective, high quality projects that result in fast time-to-benefit. Tight integration across Consulting, Development and Support puts the entire Oracle team behind your project's success
- For more detailed information regarding this offering you should review the detailed Scoping Datasheet that supports it with your consulting sales representative. Please refer to Oracle Consulting Service Agreement for provision of services Terms and Conditions. All prices quoted are exclusive of VAT and expenses.

Within this approach the Oracle Business Adoption team can be utilised as an optional service either to provide an initial set of Business Readiness workshops to help mobilise and quickly leverage the maximum value from the transformation process, or alternatively to engage more heavily throughout the project to assist you with all your business adoption needs.

About Oracle Consulting

Oracle Consulting is the #1 Consulting Organisation for Oracle Cloud Implementation. The team is focused exclusively on Oracle Cloud solutions and staffed with the experts that others turn to for best practices. With our global scale of more than 7,000 experts in 175 countries serving more than 20 million users, we know how to get you up and running in the Oracle Cloud as quickly and cost effectively as possible.

Oracle Consulting uses field-tested methodology and a network of worldwide experts to develop solutions that address your challenges and strategic initiatives, providing you with a complete, transformational cloud journey that modernizes your business.

Accelerate Change. Drive Agility.

Strategize, accelerate, and transform your future.

- **Create your cloud strategy.** Define a cloud migration strategy and develop use cases.
