“Our clients trust Oracle Clinical and Oracle Remote Data Capture. The solutions help us improve clinical trial efficiency and facilitate compliance with international regulations, such as the FDA’s 21 CFR Part 11 requirement.” – Carole Martini, Director, Data Management, Accovion GmbH

Accovion GmbH Cuts Clinical Trial Data Clarification Costs by 50%

As a full-service clinical research organization (CRO), Accovion supports pharmaceutical, biotechnology, and medical device companies from early clinical trials through market authorizations for new products. Accovion is headquartered in Germany and has affiliates in Poland, the Czech Republic, Romania, Russia, and the United Kingdom. The company continuously expands its service portfolio to respond to a rapidly changing industry.

Challenges

- Enable Accovion to effectively, efficiently, and securely capture, process, manage, and analyze clinical trial data
- Implement a validated clinical trial data management system that meets industry standards and regulatory requirements, such as the U.S. Food & Drug Administration’s 21 CFR Part 11 rule

Solution

- Converted 60% of the company’s clinical studies to an electronic data capture format thanks to Oracle Clinical and Oracle Remote Data Capture, enabling fast, accurate, and efficient data management. Cut query management costs in half and accelerated delivery of quality data to clients with automatic identification of data-input errors and electronic query management, which enable clinical investigators to correct clinical trial data immediately. Gained on-demand and secure online access to clinical trial status and data
- Ensured a detailed audit trail of clinical trial processes, such as data clarification, to facilitate compliance
- Deployed Oracle Thesaurus Management System to more consistently and efficiently code clinical trial data, including adverse event information
- Validated Oracle Clinical and Oracle Remote Data Capture with RapidLIVE, an Oracle Accelerate solution from Oracle Partner pharmaSOL, to accelerate deployment
